

# Cyber Outstanding Security Performance Awards

## Global awards for cyber security

The Cyber Outstanding Security Performance Awards (Cyber OSPAs), based on the international Outstanding Security Performance Awards scheme, recognise and reward companies, people, products and initiatives across the cyber security sector.

### *What makes the Cyber OSPAs different?*

The Cyber OSPAs have been designed to be **ethical**, are based on **values** of being **independent, credible, respectable** and **transparent**.

They bring together the leading cyber security associations from around the world to recognize and highlight the many success stories that often operate under the radar.

Judges, who are nominated by supporting associations, sign up to an ethics policy and mark independently against published criteria.

Categories and criteria for the awards are based on extensive research on the key factors that contribute to and characterize Outstanding Performance.
